# Introduction

Great to see that you're interested in our project!

Here, you will learn about us and why we have put our heart and soul into it. We have built this project intending to create something lasting, where we don't have to worry about running out of funds or losing our hard-earned money to scams.

# Introduction

As many of us have been working online for years, we have learned that there are always issues with projects. It could be a high ROI project with daily percentage returns that eventually runs dry. Or the project might have been doing well, but the team decides to abandon it. Sometimes, when we try to withdraw funds, they don't reflect in our account and remain pending. We may end up having to pay fees and miss out on commissions due to unmet goals or delays. It's not fair when we have to juggle both the left and right sides.

That's where we come in! We will invite you to a presentation where we will highlight the strong points of our project and the functions we will provide that will make you and your team want to work with us. Honesty and transparency are important values for us, and we are grateful for the opportunity to build a smart contract that can be verified to work as promised.

So, if you're ready to learn what sets us apart from the competition, be sure to pay close attention to this PDF. We are here to bring a revolution to the DeFi space, and in the next few minutes, you will find out why!

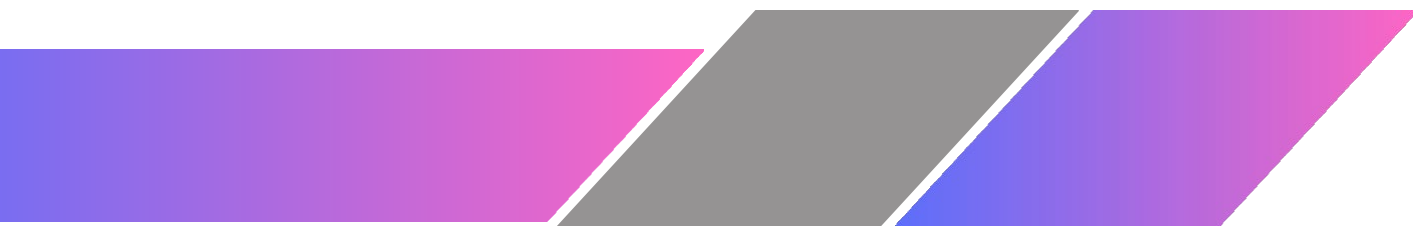

**ABUNDANCE DEFI**

## **FOUNDER**

**A dedicated family man and an expert in the field of cryptocurrencies. He is committed to sharing his knowledge with the world and believes that the world of crypto has the potential to create a more equitable and decentralized financial system.**

# What sets us apart?

Our Smart Contract can be best described as a crowdfunding program executed on the Binance Smart Chain. We are here to ensure that those who wish to take control of their lives and make positive changes have a genuine opportunity to do so.

Our project has several strong points, which I will outline below. By joining us, you will have multiple ways to earn and learn. One of them is by building your downline and earning instant commissions. Another way is by having an active upline, which will provide random under spill. Additionally, besides receiving commissions directly in your wallet, you will also receive our WEALTH Token. We have created a token that will be given away with every direct signup and level unlock in our project. When money comes in, 20% of the funds will automatically be used to buy 10% USDT (BEP20) and 10% WEALTH.

# OUR TOKEN CAN NOT BE BOUGHT BY ANYBODY ELSE BESIDES THE AUTOBUY CONTRACT

We are committed to preventing manipulation from the very beginning and ensuring that organic price growth occurs. Additionally, as an extra commission on the first level, we will be offering Tokens to reward those who actively contribute to the success of the project.

# Our most welcome solution to online money-making struggles.

We have combined multiple strong points that we have come to love in the crypto world! One of our unique features is earning instant commissions directly to our wallet, with no need for withdrawals. We are also the first project to reward you with a Token that grows alongside the project, without being manipulated by outside forces with ulterior motives.

Our commission structure spans 10 different levels, starting from just \$2.50 USDT, making it an affordable option no matter where you are. We also have an automatic cycling system in place, where the 4th signup travels down a level, ensuring that you can earn commissions for the work you deliver (the 4th signup is placed randomly under one of your direct downlines).

Furthermore, our levels do not close over time, once opened they remain open forever, providing a reliable and continuous earning opportunity. We operate on a reliable chain with low gas prices and fast transaction speeds. Additionally, our team is transparent and does not hide behind anonymity, and we are committed to building multiple projects that support abundance.

# Package Levels

As we aim to create a project that satisfies the masses, a lot of thought has gone into the distribution of tokens. We have decided to go with solid numbers to ensure that our code functions properly and everyone receives fair treatment. The price of the level will be on the left side, while the amount of coins you receive upon joining our project will be on the right side.

Pkg 1: \$2.50 | Tokens Distributed: 250

Pkg 2: \$5.00 | Tokens Distributed: 500

Pkg 3: \$10.00 | Tokens Distributed: 1000

Pkg 4: \$25.00 | Tokens Distributed: 2500

Pkg 5: \$50.00 | Tokens Distributed: 5000

Pkg 6: \$100.00 | Tokens Distributed: 10000

Pkg 7: \$250.00 | Tokens Distributed: 25000

Pkg 8: \$500.00 | Tokens Distributed: 50000

Pkg 9: \$1000.00 | Tokens Distributed: 100000

Pkg 10: \$2500.00 | Tokens Distributed: 250000

# Token Commission Structure

Package / Package Amount	Tokens
Package 1 \$2.50	15
Package 2 \$5.00	25
Package 3 \$10.00	50
Package 4 \$25.00	100
Package 5 \$50.00	200
Package 6 \$100.00	500
Package 7 \$250.00	1250
Package 8 \$500.00	2000
Package 9 \$1000.00	4000
Package 10 \$2500.00	10000

We have carefully considered the token dynamics to prevent excessive selling pressure and potential price decline. As a result, we have chosen to distribute our token as a reward for making a direct signup, incentivizing team building, and promotion. The price of the level will be displayed on the left side, while the number of tokens you receive upon making a signup will be indicated on the right side.

# Commission Structure

The AUTO-BUY feature of the token will be set at 20%, ensuring more significant price growth. This will consist of 10% USDT (BEP20) and 10% WEALTH Tokens, combined to add liquidity. Additionally, 4% of the USDT income will be reserved for marketing expenses, which will be spent based on community demands. This could include mass advertising, hiring a professional agency, or partnering with influencers.

LEVEL	Reward %
1	39%
2	12%
3	7.5%
4	4%
5	3.5%
6	3%
7	2.5%
8	2%
9	1.5%
10	1%

# What happens with commission outside of the structure of packages?

When the commission structure is not yet 10 levels deep, or the person has not unlocked all packages and invites somebody who invests more than them (ranging from \$2.5 up to \$2500, which is the entry amount), the money outside of the commission structure will be divided over 5 wallets. This division will be transparent and used to create income and possibilities for the community.

This will be equally divided like this:

%20 Forex Copy Traders

%20 Crypto Copy Traders

%20 Yield farming /Stables /BTC /ETH

%20 Developing Abundance Ecosystem

%20 Marketing /Management /Paying Moderators /Upkeep of site /Many other things

# What to expect from the things that will be added to the ecosystem?

As we are committed to ensuring the safety and skillset development of everyone, we have some exciting additions in store for those working with us. Our ecosystem will initially focus on sharing information and will include a way for all our community members to safely interact and guide each other in case of any issues. There is one note I would like to mention, and that is that we are happy to offer gamification, where rising in levels will earn you XP and positive actions will be rewarded. The first addition to our ecosystem will be a Forum, where people can ask questions, seek and offer support.

The second addition will be a place where people can write reviews, and learn about different ways to work and stay safe. There will also be an educational component where people can test their knowledge. In due time, more and more functions will be added as we have many ideas and a skilled developer team ready to execute them! Another addition we will implement is a PTC-Task site, where our members can place ads and links for others to watch or join, and make money by actively exploring our ecosystem.

Additionally, we will be releasing a roadmap soon to provide more insights into our plans for the future.

We will also be including a Social-Exchange feature. In short, if you're looking for members for your Instagram, Facebook, Telegram, or YouTube, look no further as we have a community of REAL PEOPLE ready to assist you in your growth for just \$0.05 per person.

With us, you are ensured of organic growth. If you have an airdrop that you want members for, simply post it and get signups for \$0.05 per signup.

A place where you can learn to build yourself as a brand. Here, you will gain insights into different ways of advertising, how to effectively communicate with people, and develop basic social skills to build long-term relationships.

We will explain the options that professionals use, such as mass marketing, mailing lists, freelancers, Fiverr, banner ads, and more, in simple terms. Additionally, this section will be open for guest writers as we combine our collective expertise.

We are fully transparent about our revenue generation methods, how much we earn, and how much we give back to the community. We also provide a platform where you can hire people to perform various tasks, ranging from creating a PDF, editing an image, or creating something based on your specifications. We have a Task wall and survey area where individuals can earn some extra income by completing tasks. Additionally, we offer advertising options on our site, such as banner ads placed in different sections, to showcase your legitimate offerings to our entire community.
